Release name: KNOWAGE 8.0.6

From the previous version 8.0.5 the following bugs have been solved:

- CUSTOM CHART: the "expand to full page" option is not working correctly
- Wrong session manager on menu
- JS error on Dashboard with external document
- The administrator cannot save the KPI rule
- Direct link to a public document does not work
- The end user menu does not scroll when contains a lot of element
- Cross navigation preview does not work with alias column
- An error occurs when a public analysis automatically refreshes for an indefinite amount of time
- Heatmap does not correctly display the data when using "order on second category"
- Heatmap tooltip background displayed is entirely black
- GALLERY: importing an existing template is not working
- REGISTRY: the timestamp is displayed incorrectly when the field is not editable
- MAP WIDGET: map centering does not work properly
- MAP WIDGET: the color scale range changes only when the dataset is completely refreshed
- User cannot get direct link or HTML code to embed if the public role is missing
- Import document: user cannot create directory in server resources
- Import document: error related to SBI_OBJ_PARVIEW occurs
- Analytical Drivers: analytical driver cannot assume value after changing role
